PROGRESS REPORT

- **What changed?**
 - **Infrastructure and Land Use criteria were applied in terms of the original Engineering Evaluation/Cost Analysis (EE/CA) land use groupings**
 - **Type of Hazard took into account the density of live items found over the total acreage of the AOC; changed the scoring range to 25-150 for Type of Hazard and Overall Hazard**
 - **Cost was ranked highest to lowest in terms of percent complete and cost to complete**
 - **Access was evaluated in terms of new construction, changed land usage**

ALTERNATIVES:

- **Accept the *DRAFT FINAL* version (and continue to refine it, as necessary)**
- **Combine and simplify the Criteria and re-vote using six votes per member**
 - For example, combine Overall Hazard and Type of Hazard; combine Land Use with Infrastructure; and delete Legal Restrictions category
- **Start over with a facilitator and develop new prioritization criteria and/or refine the entire prioritization process**
