## Status Update

- Post-removal verification (PRV) activities are ongoing
  - Intent is to verify the effectiveness of the munitions response effort
  - Geophysical mapping of transects performed over ~ 9% of the East Extension Area
  - Resulting anomalies subsequently investigated
  - PRV findings are currently being evaluated
- Post-removal verification reporting
  - Once the evaluation of findings is complete, a PRV report will be generated
  - Summarize PRV methods and findings
  - Root cause analysis for any munitions-related items recovered
  - Obtain CDPHE concurrence on final PRV

FLTA PRV Transects

## Status Update

- Final USACE Quality Assurance (QA) activities are ongoing
  - Final review and acceptance of existing geophysical data and data processing procedures
  - Limited additional field work
    - Partial DGM within 6 site grids
    - Digging of select anomalies within 24 site grids
  - Additional funding is required to complete QA activities. USACE is currently pursuing additional funds from the Air Force
